

For over a decade the Suscos have been honoring their son/brother in hosting the *Running with Tim 8k/2k* race and fun run. And every year, Washington Regional Transplant Community (WRTC) – the organ procurement organization that serves Northern Virginia – has proudly been the benefactor of proceeds raised from this family-friendly community event.

The Suscos' generous contributions enable WRTC to implement public outreach initiatives that educate the community about the importance of organ, eye and tissue donation. Did you know that in the last decade almost 8,000 lifesaving transplants have occurred in Virginia, and thousands of lives have been enhanced through eye and tissue donation?

But there is still much work to be done. Approximately 21 people die every day in this country waiting for a lifesaving organ transplant. Here in Virginia, more than 3,000 people are on the national transplant waiting list. We need your help!

Your gift will assist WRTC in its efforts to register individuals as organ, eye and tissue donors – which directly translates into lives being saved. Thank you for your consideration in supporting the Suscos and saving lives in your community.

With sincere gratitude,

Lori E. Brigham
President and CEO
Washington Regional Transplant Community
